Results of pesticide analysis meet the orientation value (0,01 mg/kg) of the Association of Organic Processors, Wholesalers, and Retailers in Germany (Bundesverband Naturkost Naturwaren e.V. (BNN)) taking into account a processing factor of 4.

It is noted that the results of the analysis allow no conclusion about the origin of the detected substances. Therefore, it is necessary to check if the requirements of Regulation (EU) 2018/848 laying down rules for organic agriculture are met.
