2) PRODUCT DATA:

Description:	Sun dried organic dates are pitted, passed through pitting machine, inspected on sorters to remove foreign materials prior to dicing/slicing. Rice flour is used during dicing as an anti caking agent for free-flowing. The goods can be diced as regular or irregular sizes such as 2*4, 5*5, 3*10, 5*7, 6*6, 8*8 mm etc. The calibration is done by using circular sieves after dicing. Diced dates are inspected again by the sorters, magnetically screened and pass through the metal detector. The dates are grown organically according to EC regulations for organic agriculture, ie. EC 889/2008, 834/2007, Demeter, Bio Suisse, JAS, NOP etc.
